- **Deployment:** VPS Deployment, GoDaddy, Hostinger, Terminal-Based Deployment
- **Domains:** ERP, CRM, HRM, Manufacturing, Trading, Printing, Sales & Production Workflows

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer

Mahe Software Solutions
Erode, Tamil Nadu, India
May 2025 – Present

Client Location: Champion Paper Industry, Nasiyanoor, Tamil Nadu, India

- Gather and analyze client requirements and translate business workflows into functional software solutions.
- Guide a web development team of approximately five members by discussing requirements, coordinating development activities, assigning bugs and corrections, and following tasks through completion.
- Take ownership of major development requirements across ERP web applications using **Python, Django, PostgreSQL/MySQL, HTML, CSS, and JavaScript**.
- Independently own end-to-end **Flutter mobile application development**, including feature implementation, REST API integration, testing, and application updates.

- Develop and integrate **Python/Django REST APIs** using JSON-based request and response communication and validate APIs using Postman.
- Use **Git and GitHub** for source code version control and collaborative development workflows.
- Handle application deployment and production updates on **GoDaddy and Hostinger VPS environments** through terminal-based deployment processes.
- Configure and use **Firebase Push Notifications** for mobile application functionality.
- Work across ERP, CRM, and HRM workflows covering purchasing, production, sales, billing, leads, customer follow-up, task management, and attendance.

Software Engineer — Freelancer

IBC Infotech
Erode, Tamil Nadu, India
September 2024 – April 2025

- Gathered requirements directly from clients and translated business needs into application functionality.
- Developed **ERP and MLM software solutions** based on client-specific requirements.
- Worked across web and mobile application development and implemented functionality based on business workflows.

Software Engineer

Aithent Technologies Pvt. Ltd.
Chennai, Tamil Nadu, India
April 2023 – August 2023

- Implemented development tasks, application requirements, and modifications assigned by the Team Lead.
- Identified and resolved application bugs and functional corrections.
- Supported ongoing software development and application maintenance activities.

Programmer Analyst

Aaram Developers Management (ADM)
Coimbatore, Tamil Nadu, India
January 2022 – April 2023

- Tested web application code and functionality developed by the development team.
- Identified and resolved application bugs, issues, and functional corrections.
- Supported application testing and maintenance to improve software functionality and stability.

KEY PROJECTS

SAA Sublimation — ERP, CRM & HRM Solution

Python | Django | PostgreSQL | HTML | CSS | JavaScript | Flutter | Dart | REST APIs | Firebase

ERP solution for a paper industry involved in both **manufacturing and trading sublimation paper**, covering purchasing, production, sales, billing, CRM, and HRM operations.

- Develop and maintain ERP functionality supporting paper purchasing, production, product handling, sales, billing, and trading workflows.
- Own the associated Flutter mobile application covering **task management, customer follow-up, lead management, tracking, attendance, CRM, and HRM functionality**.

- Integrate the Flutter application with Python/Django REST APIs and use Firebase for push notification functionality.
- Coordinate web development requirements with the team while independently managing mobile application development.

Tally – SAA Sublimation Integration Application

Flutter | Dart | XML | Python | Django | REST APIs | PostgreSQL

- Developed the core integration process for connecting a Flutter-based executable application with **Tally** installed on the user's system.
- Implemented **XML requests** to retrieve Tally data and transfer it to the SAA Sublimation Django application through APIs.
- Implemented the workflow for processing, storing, and displaying transferred Tally data within the web application.
- Led the primary development and integration work in a two-member setup while coordinating frontend UI work with a junior developer.

SAA Prints — Printing Industry ERP

Python | Django | MySQL | HTML | CSS | JavaScript

- Work on ERP workflows for a sublimation printing business covering customer job work, material handling, design selection, **job cards, printing, fusing, delivery, and billing**.
- Develop and maintain application functionality based on printing-industry requirements and handle ongoing requirements, corrections, and bugs.

SAA TNPL — Paper Trading ERP

Core PHP | MySQL | HTML | CSS | JavaScript

- Took responsibility for the complete development of a trading-focused ERP application for bulk paper purchasing and customer sales.
- Developed **purchase orders, sales orders, product management, and pricing workflows** for paper products including different sizes and GSM specifications.

EDUCATION

Bachelor of Commerce — Computer Applications (B.Com CA)

Government Arts and Science College
Periyar University
Komarapalayam, Namakkal District, Tamil Nadu, India
2019 – 2022
